## **Coastal Fire Centre: Status Report**

Prepared 05/05/2021

Zone Fire Danger Rating and Activity Level						
Zone	Fire Danger Rating	Activity Level				
Fraser	Low to very Low	1				
Pemberton	Low to very Low	1				
Sunshine Coast	Low to very Low	1				
South Island	Low to Very Low	1				
Mid Island	Very Low	1				
North Island	Very Low	1				
Central Coast (Bella Coola)	Low to Very Low	1				
Haida Gwaii	Very Low	1				

#### **Overview**

The Coastal Fire Centre has experienced a downturn in fire activity in the last week, as opposed to a busy few weeks during the dry period in April.

Fire Activity has been low.

Last Week			
	This Fire Season (since April 1)	Last Year (2020)	10-Year Avg. (2011 – 2020)
Total Fires to Date	20	22	9
Total Hectares to Date	28	233	53

### Active Fires

There is one active, Under Control fire within the Coastal Fire Centre, approximately 8 ha SE of Gold River. The Matchlee Bay fire started in a cut block, with forestry debris on the surface of the soil. It is burning in very steep, unstable terrain.

The fire is currently being patrolled periodically. There are areas of the fire that are too steep and unsafe for crews to access to be able to fully extinguish this fire at this time.

### **Fire Prohibitions and Restrictions**

**Fire Activity** 

1 (0 lightning-caused/ 1 human-caused) \*Subtotals may not add up to the total, since fires not classified as

"lightning-caused" or "human-caused" are still under investigation.

For more information on specific activities that are prohibited during a Category 2, Category 3 or campfire prohibition, visit <a href="https://www2.gov.bc.ca//gov/content/safety/wildfire-status">https://www2.gov.bc.ca//gov/content/safety/wildfire-status</a>

### **Coastal Fire Centre: Fire Zones**

Click <u>here</u> for more information about the Coastal Fire Centre (Fire Danger Rating Maps, Danger Class Reports, Fire Weather Maps, Active Wildfire Map) or visit: <u>https://www2.gov.bc.ca//gov/co</u> <u>ntent/safety/wildfire-status</u>

#### Weather Forecast

OUTLOOK (Friday - Sunday): The upper trough weakens and moves inland before sliding southeastward in this timeframe, leaving a northwesterly flow aloft in its wake and continuing unsettled weather. Patchy instability continues the trend of cloud and some showers for Friday, with another disorganized frontal wave hitting the coast late Saturday bringing more precipitation. Sunday could see some gradual improvement through the day as these features depart or weaken, and an offshore upper ridge starts to gain some momentum. Temperatures are likely to remain a bit on the cool side of seasonal in this timeframe, with no issues expected around RH. Although no really strong winds are seen in this timeframe, we could see things adjust as the pattern develops.

# **Coastal Fire Centre: Status Report**

Prepared X/X/2020

Zone Activity Level		Fire Danger Rating		
Level 1: (Exporting)		Status	Description	
	mal fire activity; no additional resource support is anticipated resources to deal with anticipated fire demands	Low	Fires may start easily and spread quickly but there will be minimal involvement of deeper fuel layers or larger fuels.	
	d anticipate possible support for non-wildfire provincial emergencies	-	Forest fuels are drying and there is an increased risk of surface fires starting. Carry out any forest activities with	
	rces may be deployed to other zones, fire centres, and out of province	Moderate	caution.	
Level 2: (Exporting/ Holding)		High	Forest fuels are very dry and the fire risk is serious. New fires may start easily, burn vigorously, and challenge fire suppression efforts. Open burning and industrial activities may be restricted.	
There is an increase in fire activity; zone resources are adequate to meet their			Extremely dry forest fuels and the fire risk is very serious. New fires will start easily, spread rapidly, and challenge fire	
demands		Extreme suppression efforts. Open burning, industrial activities and campfires may be restricted.		
	d anticipate possible support for non-wildfire provincial emergencies ources may be deployable to other zones, fire centres, or out of province		Wildfire Ranks	
Limited res	Level 3: (Holding)			
There is an	increase in fire activity; zone may not be able to meet local resource	Rank	Description	
demands	increase in the activity, zone may not be able to meet local resource		Characteristics: Smouldering ground fire, no open flame, white smoke, slow (i.e. creeping) rate of fire spread.	
Resources	<ul> <li>Resources from other zones / fire centres may be requested to assist zone activity</li> <li>Long term strategic planning becomes critical in determining what resources are</li> </ul>		Firefighting tactics: Direct attack with ground crews using hand tools and water delivery systems (i.e. pumps and	
			hose).	
<ul> <li>needed where</li> <li>Zone staff on standby based on anticipated needs</li> </ul>		2	Characteristics: Surface fire, visible, open flame, unorganised or inconsistent flame front, slow rate of spread. Firefighting tactics: Direct attack with ground crews using hand tools, water delivery systems, or heavy equipment.	
		-	Hand constructed control lines and lines that have been cleared of combustible material will likely be successful.	
	Level 4: (Holding/ Importing)		Characteristics: Organised flame front – fire progressing in organised manner, occasional candling may be observed	
	he zone is experiencing a high level of fire activity		<ul> <li>along the perimeter and/or within the fire, moderate rate of spread.</li> <li>Firefighting tactics: Hand constructed control lines alone are likely to be challenged, ground crews conducting direct attack may require air support from fixed-wing air tankers, skimmers or helicopters conducting bucketing or tanking</li> </ul>	
<ul> <li>Zone resources will need to be supplemented from other zones / fire centres / type 2 crews</li> </ul>		3		
			operations. Control lines constructed by heavy equipment will generally be effective.	
provincial resource capacity is not able to handle fire demands			<b>Characteristics:</b> Grey to black smoke, organised surface flame front, moderate to fast rate of spread on the ground, short aerial bursts through the forest canopy, short-range spotting.	
Level 5: (Importing)		4	Firefighting tactics: Ground operations may not be successful at the head of the fire, indirect tactics may be required	
The zone is experiencing very significant fire activity, and/or extreme fire behaviour;			to bring the head of the fire under control. Parallel attack may be used along the flanks of the fire to direct the head	
	heavy demands on provincial and fire centre resources are occurring and anticipated		into favourable ground or fuels. Air operations may be required to support ground personnel. Characteristics: Black to copper smoke, organised crown fire front, moderate to long-range spotting and spot fire	
<ul> <li>to continue</li> <li>Resource capacity is supplemented with staff from Wildfire TEAMS, other Ministries, the forest sector, Fire Departments, and type 2/3 resources</li> </ul>		5	growth.	
			<b>Firefighting tactics:</b> The limited options available include indirect attack and planned ignitions to remove fuel in the path of this type of fire behaviour. Ground operations are often restricted to fighting the least active sections of the fire or conducting ground ignition operations from secure control lines with readily available escape routes and	
Out of Control	Describes a wildfire that is not responding (or only responding on a limited basis) to suppression action, such that the perimeter spread is		<b>Characteristics:</b> Organised crown fire front, long-range spotting and independent spot fire growth, possible fireballs and whirls, violent fire behaviour probable, a dominant smoke column may develop which influences fire behaviour.	
	not being contained.		Firefighting tactics: Firefighting under these conditions is extremely dangerous. Suppression efforts will be well away	
	Indicates that (with the resources currently committed to the fire)	6	from active fire behaviour and may include preparing structure protection measures or conducting indirect large-	
Being Held	sufficient suppression action has been taken that the fire is not likely to		scale ignition operations in an attempt to steer the fire. Often, the safest and most prudent strategy is to pull resources back to safe areas, ensure that personnel and the general public are safe, and wait for fire behaviour to	
Denigricia	spread beyond existing or predetermined boundaries under the		lessen before re-engaging in fire suppression operations.	
	prevailing and forecasted conditions.			
Under Control	The fire has received sufficient suppression action to ensure no further	1		
	spread of the fire.	**
